

Check Weigh Scales

In food production, it is important to ensure uniform portioning across a batch of product to guarantee value for money for the end user and reduce operator related waste costs. It is best to have a guide for operators instead of relying on the manual portioning estimation of the operator.

The check weigh bench or work station is a great solution to this, it increases productivity and reduces 'give-aways'. It is suitable for multiple applications as a stand-alone scale or part on a complete system.

The best solutions for all your

Weighing requirements

Technical Features

Work Station

- 304 stainless steel
- IP68 stainless steel loadcell
- IP68 stainless steel weigh head
- Colour changing display 40 mm LCD for easy viewing
- Mains or rechargeable battery (optional)
