Innovative Software Weighing Solutions

Email, Text and other Reporting Options

QUALITY

Our ISO 9001:2008 registration ensures that all of our products are manufactured to strict quality standards and are fully QA tested and calibrated by our highly trained engineers.

EXPERIENCE

The quality and reliability of the VW range of weighing scales and software is the result of over 25 years of design and manufacturing experience.

RELIABILITY

Every project is constructed with the reliability in mind, ensuring durable, maintenance free operation. The 825 can be kept up to date by easily uploading the latest software revisions remotely.

SOLUTIONS

All of our software is written and supported by our in-house programmers and carefully managed from initial conception to final commissioning by our project managers. This allows us to offer software solutions for almost any project requirement.

- Access weight data, how you want, when you want and wherever you are in the world
- Complete reports available live, on-demand, on-alarm condition or scheduled via WiFi,
 Email, USB, SMS texts, FTP, HTML and CIFS.
- Receive automated texts (e.g. when weight reaches target), or send the 825 a text to request data ideal for remote locations.
- Fully customisable with an intuitive user interface utilising the latest technology
- Securely view and control the 825 from any PC, anywhere in the world, giving you complete control over your weighing

Keep track of production on the go with the Cardinal 825. View the weight screen live from your PC and receive reports via email or text, scheduled, on-alarm or on-demand.

These powerful reporting options are available on any 825 software application. When connected to the internet the 825 can send emails, save reports to your network, save reports to a USB stick and even display live web pages of transactions. Even where there is no internet connection the 825 can use mobile networks to send and receive texts.

Monitor your production live by viewing and controlling the weighing screen from any PC, anywhere in the world. All you need is an internet connection and a password and you can see exactly what is happening on the 825 live on your PC. And if you need to help operators or run transactions simply use the PC keyboard and mouse to remote control the 825, an ideal tool for supervisors.

Remote into the 825 from any PC, anywhere in the world and take control of the screen to run a transaction, download a report or adjust settings. The 825 can also be updated and supported remotely by our team.

Our ISO 9001:2008 registration includes our quality system approval for Self Verification, allowing us to verify platform scales for trade use here at our factory. All VW platforms use OIML approved loadcells and are designed for Class III approval.

CUSTOMER SUPPORT

We provide the highest level of before and after sales and service support. Our technical staff are highly experienced and knowledgeable in all aspects of the weighing industry and are ready to provide support and advice on any of our products.

"Catlin have been very happy with the products and services received from AWM Limited. The team were flexible and able to meet our requirements to develop a unique program and interface that was simple and easy for our users. The product was tailored to our own specifications, meeting all of our requirements, with the delivery of the project on time. I would recommend AWM to anyone looking for a similar weighing solution."

David, Catlin Holdings Ltd, London

Reporting Options Available

- · Login to the 825 from any PC on its network and access the report files directly from the 825 memory
- Have a shared folder on a PC/Server where the 825 can automatically save Excel report files using CIFS or FTP.
- Save the reports to any USB stick using the on-board USB Port and open in Microsoft Excel
- Schedule the 825 to email reports in Excel or other formats at regular intervals
- Open a live html web page created by the 825 in any standard browser to display and monitor the weight data
- Use Excel to open a html report, creating a spreadsheet that updates every minute
- Set an alarm such as a minimum weight that, when reached, sends an email or text notifying the user
- Send a text to the 825 requesting the current weight or other stored information. The 825 will send a text reply within a few seconds with the required information. Texts can also be scheduled as required.

Further Details

1. SMS Texting

- Use any standard "pay as you go" SIM card from any provider
- Ideal for monitoring remote location with no WiFi access
- Used for monitoring, reporting, weighbridge tickets etc
 Commands include "W" to receive weight data and "G" to receive gross weight - with custom command available.
- Compatible with new or existing 825 software applications
- Texts can be sent on scheduled intervals or on alarm/target weight.

• Send to any email address (copy up to 3 additional addresses)

• Ideal for tracking and monitoring weighings in real time • Efficiently inform customers of their purchases/sales

Send emails at scheduled times for end of shift/day reports

· Report sent as attachment in text or .csv format

3. Web Page

2. Emailing

or after every transaction

- 825 creates its own webpage to host real time reports
- Complete live reporting, all in one place, accessible from anywhere in the world
- Access webpage via PC, Mobile Phone or Tablet
- Monitor production for farms, factories & weighbridges etc.
- Webpage available online or on local network

- 825 can save reports to a USB stick automatically or manually
- To view report, remove USB stick from 825 and insert into PC
- Double click on the report file which will then open in Excel

All html and csv reports mentioned above can be opened in Excel for quick and easy analysis.
