

Uniwin Weighbridge Software

The screenshot displays the Uniwin Weighbridge Software interface. At the top, there is a menu bar with options: File, View, Closure, Report, Devices, Settings, Help. Below the menu bar are buttons for 'New', 'Modify', 'Weigh', and 'Copy Ticket'. The Phoenix Scales Limited logo is in the top right corner. On the left side, there is a green truck icon and the text '2000 kg'. The main data entry area contains several fields:

- Registration: YS1500Y
- Drivers Name: Steve Price
- Hauler: SDL Solutions
- Customer/Supplier: 3 (dropdown menu showing SDL Solutions Ltd)
- Order Reference: 1234
- Product: S (dropdown menu showing Sand)
- Source: AB (dropdown menu showing Aberdeen)
- Destination: CS (dropdown menu showing Customer's Site)
- Remarks: Test Loads
- Weight 1, Weight 2, and Nett Weight: Each has a table with five empty input cells.
- Ticket Number: A separate input field.

An 'OK' button with a green checkmark is located at the bottom left of the interface.

Uniwin Weighbridge Software is a modular system that grows with your business, you only pay for the elements you need. The system's flexible configuration means it can easily be adapted or extended as your business changes. New equipment can be added or removed, new applications introduced or additional sites added onto the same system. As a Windows-based package it can hold several years of transactional data for analysis and traceability.

The data entry screens can be configured to capture the information required, with fields being either table linked, free entry or a combination of both. Fields can also be made mandatory at either 1st or 2nd weighings. Any number of weighbridges can be connected and being fully network compatible weighings can be carried out on several bridges at the same time.

The best solutions for all your

Weighing requirements

Technical Features

Reports

A flexible reporting module allows the user to sort information on any criteria over any given date and time range. Reports can be tailored and scheduled to be printed out to any network printer available.

File Handling

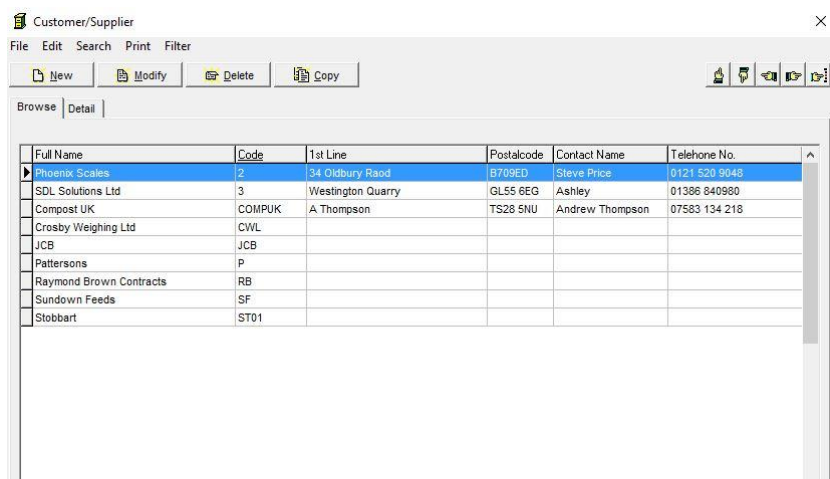

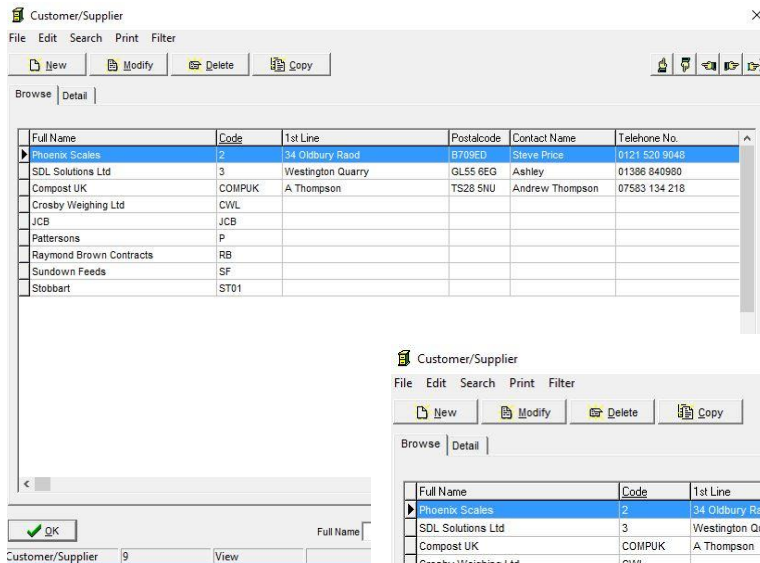

All files within Uniwin operate using a menu selection, button or short key. Daily, Weekly, Monthly In and Out totals can be maintained together with financial information.

Data collection

- Supplier eg Andersons (drop down from pre populated)
- Date (automatic)
- Vehicle Registration Number (Operator Key in)
- Time In (automatic)
- Time Out (automatic)
- Weight In (automatic)
- Weight Out (automatic)

Data Output

- Recall records within the software for any queries raised during the processing
- Output a date range of records (i.e. on month)
- Output by and supplier
- Output file type that can be imported into excel or 3rd party software (.txt, .csv)
